

GPSR Safety Certificate

Product Name: Leather Fetlock Boots with Double Velcro (Set of 2)

Artikelnummer: SR10201

Intended use:

The fetlock boots are used to protect the horse's hind legs from injuries caused by stripes or hitting during training or exercise. They protect the fetlock and ball region in particular from blows from the opposite limbs. The product is intended exclusively for intended use on horses and may not be used as a fixation, bandage or permanent covering.

Material information:

High quality genuine leather - a natural, durable and breathable material. It is characterized by high tear resistance and dimensional stability. Since this is a natural product, slight color and structure variations may occur. The leather is free of harmful substances and comes from responsible production.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use as intended use as leg protection on horses.
- Before each use, check for damage, tears, loose seams, worn upholstery or broken fasteners.
- Do not use on open wounds, skin injuries or irritated skin areas.
- If the fetlock boots are damaged or heavily worn, they must not be used.
- Check the fit regularly to avoid pressure points, chafing or circulation problems.
- Do not put it on too tightly – sufficient freedom of movement for the limbs must be ensured.
- Clean and allow to dry after each use to avoid skin irritation or material damage.
- Care for leather regularly to prevent drying out and material breakage.
- Allow wet leather to dry at room temperature, not on radiators or in direct sunlight.
- Do not make any unauthorized changes or repairs to the product.
- Do not store near open flames, heat sources or chemical substances.

Disposal information:

The product is made of genuine leather and metal components. Real leather is a natural material and can be disposed of with household waste if there is no municipal collection for leather scraps. If possible, metal parts should be separated and recycled as scrap metal before disposal. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
