

GPSR Safety Certificate

Product name: saddle pad dressage "Cloud One"

Artikelnummer: SR10207

Intended use:

The saddle pad serves as a shock-absorbing and pressure-equalizing pad between the saddle and the horse's back. It supports even pressure distribution, improves the fit of the saddle and protects the horse's back muscles from pressure points and friction. The product is intended exclusively for intended use on horses in combination with a suitable saddle and may not be used as a stand-alone base, transport or fixation aid. Application on open wounds, skin injuries or irritated skin areas is not permitted.

Material information:

The product consists of a memory foam and neoprene inner layer, a mesh backline, a silicone print pattern on the top and a polyester outer material. Memory foam ensures optimal shock absorption and pressure distribution, while neoprene supports the stability and elasticity of the base. The mesh inserts along the back line ensure good air circulation and prevent heat build-up. The silicone print pattern ensures slip resistance between the pad and saddle. The outer material made of polyester is durable, easy to care for and keeps its shape. All materials are of synthetic origin and free of animal components.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for its intended purpose as a saddle pad on the horse.
- Do not use on open wounds, skin injuries or irritated skin areas.
- Before each use, check for damage, tears, loose seams or deformation.
- If the saddle pad is damaged or heavily worn, it must not be used.
- Check the fit and fit of the saddle regularly to avoid pressure or chafing.
- Do not use for too long in damp or wet conditions to prevent skin irritation and material damage.
- Do not make any unauthorized changes or repairs to the product.
- Clean only according to care label - do not use chemical cleaners, bleach or solvents.
- After cleaning, allow to dry completely before reusing or storing the product.

- Do not store or dry near open flames, heat sources or chemical substances.
- Do not leave the horse unattended.

Disposal information:

The product is made of synthetic materials such as memory foam, neoprene, mesh, silicone and polyester, which are not biodegradable. The saddle pad can be disposed of with normal household waste, provided there is no municipal collection for textile or plastic waste. Material separation is not necessary in the private sector. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
