

# GPSR Safety Certificate

Product Name: Box Lock

Artikelnummer: SR10219

## **Intended use:**

The box barrier is used to partially block off the entrance area of a horse box. It allows the horse to extend its head out of the box while preventing it from leaving the box completely. The product is intended exclusively for intended use in horse boxes and may not be used as a fixation, tethering device or securing element for transport.

## **Material information:**

The product is made of polyester. Polyester is a synthetic material with high tear resistance, dimensional stability and durability. It is easy to care for, insensitive to moisture, durable and free of animal ingredients.

## **Security rating:**

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

## **Warnings:**

- Only use as a barrier in the entrance area of horse boxes for its intended purpose.
- Before each use, check for a tight fit, secure attachment and damage.
- If there is damage, cracks, bent metal parts or material fatigue, the box lock must not be used.
- Check regularly whether the product is securely fastened and there is no risk of it getting caught or trapped.
- Do not make any unauthorized changes or repairs to the product.
- Do not leave unattended within the reach of horses if there is a risk of the product being nibbled or moved.
- Do not store or use near open flames, heat sources or chemical substances.
- Only attach according to the manufacturer's instructions - improper installation can lead to injuries to people and animals.
- After cleaning, allow to dry completely before reusing or attaching the product.

## **Disposal information:**

The product is made of polyester and is not biodegradable. The stirrup protectors can be disposed of with household waste if there is no municipal collection for textile waste. Material separation is not necessary in the private sector. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
