

GPSR Safety Certificate

Product name: Hanoverian bridle "Hannover" with reins

Artikelnummer: SR10163

Intended use:

The product is used to safely guide and control the horse's head. It is intended exclusively for use on horses and must not be used for restraining without supervision.

Material information:

High quality genuine leather - a natural, durable and breathable material. It is characterized by high tear resistance and dimensional stability. Since this is a natural product, slight color and structure variations may occur. The leather is free of harmful substances and comes from responsible production.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for its intended purpose as a head piece to connect the bit, reins and horse.
- Before each use, check for material fatigue, tears, loose seams or defective fittings.
- If the bridle is damaged or heavily worn, it must not be used.
- Check the fit regularly to avoid pressure or chafing.
- Do not buckle too tightly - sufficient freedom of movement in the mouth, nose and neck area must be ensured.
- Replace defective metal parts (e.g. buckles, rings, carabiners) immediately.
- Do not carry out any unauthorized repairs or modifications.
- Clean and care for leather parts regularly to prevent drying out, material breakage or deformation.
- Allow wet leather to dry at room temperature - not on radiators or in direct sunlight.
- Do not store near open flames or sources of strong heat.
- Only use with a suitable bit that fits the horse in size and shape.
- Do not use for tethering or securing purposes.
- Clean only with suitable cleaning agents; do not use bleach or solvents.

Disposal information:

The product is made of genuine leather and metal components. Do not dispose of in household waste or the environment. Real leather is a natural material and can be disposed of with household waste if there is no municipal collection for leather scraps. If possible, metal parts should be separated and recycled as scrap metal before disposal. Do not burn product residues and do not allow them to enter waterways or the ground.

Manufacturer/responsible economic operator:

SUNRIDE GmbH

Marktplatz 12, 96242 Sonnefeld, Germany
