

GPSR Safety Certificate

Product Name: Tail Protector

Artikelnummer: SR10215

Intended use:

The tail protector is used to protect the horse's tail from dirt, chafing and hair breakage during transport or in special care situations. It protects the tail hair from wear and tear and external influences. The product is intended exclusively for intended use on horses and may not be used as a fixation, bandage or permanent covering. Application on open wounds, skin injuries or irritated skin areas is not permitted.

Material information:

The product is made of ripstop polyester fabric and fleece. Ripstop polyester is a synthetic material with woven reinforcement threads that offers high tear resistance, dimensional stability and durability. The fleece material made of polyester fibers ensures soft comfort, protection against chafing and moisture balance. Both materials are easy to care for, durable and free of animal ingredients.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for its intended purpose as tail protection on horses.
- Do not use on open wounds, skin injuries or irritated skin areas.
- Before each use, check for damage, loose seams, tears or broken fasteners.
- If the tail protector is damaged or heavily worn, it must not be used.
- Check the fit regularly to avoid pressure or chafing.
- Do not put it on too tightly - sufficient freedom of movement for the tail must be ensured.
- Clean after use and allow to dry completely to avoid skin irritation and material damage.
- Do not make any unauthorized changes or repairs to the product.
- Clean only according to care label - do not use chemical cleaners, bleach or solvents.
- Do not store or dry near open flames, heat sources or chemical substances.

Disposal information:

The product is made of ripstop polyester and fleece, both of synthetic origin and non-biodegradable. The tail protector can be disposed of with household waste if there is no municipal collection for textile waste. Material separation is not necessary in the private sector. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
