

GPSR Safety Certificate

Product name: fly hood "Wellington"

Artikelnummer: SR10210

Intended use:

The fly hood is used to protect the horse's ears and head area from insects and to dampen noise while riding or staying outdoors. It is worn under the bridle or halter and is intended exclusively for intended use on the horse. The fly hood must not be used as a cover, fixation or protective equipment against the effects of the weather.

Material information:

The breastplate is made of polyester fabric. Polyester is a synthetic material that is suitable for use in equestrian sports due to its tear resistance, dimensional stability and weather resistance. The material is easy to care for, insensitive to moisture and free of animal components.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for the intended purpose as insect protection and noise dampening on the horse's head.
- Before each use, check for damage, loose seams, tears or worn-out material.
- If the fly hood is damaged or heavily worn, it must not be used.
- Check the fit regularly to avoid pressure or chafing.
- Do not leave the horse unattended, especially in the box or pasture if there is a risk of getting caught.
- Do not make any unauthorized changes or repairs to the product.
- Clean only according to care label - do not use chemical cleaners, bleach or solvents.
- After cleaning, allow to dry completely before using the fly hood again or storing it.
- Do not store or dry near open flames, heat sources or chemical substances.

Disposal information:

The product is made of textile fabric (e.g. polyester, cotton or synthetic blended fibers). The materials are not biodegradable unless they contain synthetic fibers. The fly mask can be

disposed of with normal household waste if there is no municipal collection for textile waste. A material separation of materials is not necessary in the private sector. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
