

GPSR Safety Certificate

Product name: Fly blanket with belly flap and removable neck part "Dubai"

Item number: SR10178

Intended use:

The transport blanket is used to protect the horse from drafts, temperature fluctuations and dirt during transport. It supports the regulation of body temperature and ensures comfort and safety when loading and while driving. The product is intended exclusively for intended use on horses and may not be used as a sweat, rain or pasture blanket.

Material information:

The product is made of cotton fabric and mesh material. Cotton is a natural fiber with good breathability and moisture absorption, which ensures a comfortable wearing climate. The mesh material is made of synthetic fibers and is used for ventilation and air circulation along the back line. Both materials are skin-friendly and suitable for use on horses.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for its intended purpose as an insect protection blanket on the horse.
- Before each use, check for damage, loose seams, tears or broken fasteners.
- If the blanket is damaged or heavily worn, it may not be used.
- Check the fit regularly to avoid pressure points or chafing.
- Do not leave the horse unattended, especially not in the pasture or stable if there is an increased risk of getting stuck.
- Do not make any unauthorized changes or repairs to the product.
- Use only on clean, dry horse.
- Do not use in the rain or as protection against wet conditions.
- Clean only according to care label - do not use chemical cleaners, bleach or solvents.
- After cleaning, allow to dry completely before using the blanket again or storing it.
- Do not store or dry near open flames, heat sources or chemical substances.

Disposal information:

The product is made of cotton fabric and synthetic fiber mesh material. Cotton is biodegradable while the mesh material is not biodegradable. The blanket can be disposed of with normal household waste if there is no municipal collection for textile waste. Material separation is not necessary in the private sector. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
