

GPSR Safety Certificate

Product name: Fur halter with rope "Dover"

Artikelnummer: SR10165

Intended use:

The product is made of genuine leather and faux fur (synthetic fibers). Real leather is a natural, breathable material with high tear resistance and shape retention. Since this is a natural product, slight color and structure variations may occur. The faux fur is made of synthetic fibers and is used for padding and pressure distribution. Both materials are free of harmful substances and suitable for their intended use on horses.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for its intended purpose as a guiding and holding device on the horse.
- Before each use, check for material fatigue, tears, loose seams, damaged straps or defective fittings.
- If the halter is damaged or heavily worn, it must not be used.
- Do not use unsupervised in the stable or on the pasture - risk of strangulation.
- Check the fit regularly to avoid pressure points or chafing.
- Do not wear it too tightly – ensure sufficient freedom of movement in the neck and nose area.
- Replace defective metal parts (e.g. carabiners, buckles, rings) immediately.
- Do not carry out any unauthorized repairs or modifications.
- Do not store near open flames, heat sources or chemical substances.
- If heavily soiled or damp, clean and allow to dry completely before using the halter again.
- Clean only with suitable cleaning agents; do not use bleach or solvents.

Disposal information:

The product is made of genuine leather, faux fur (synthetic fibers) and metal components. Do not dispose of in household waste or the environment.

Real leather is a natural material and can be disposed of with household waste if there is no municipal collection for leather scraps. The faux fur is made of synthetic fibers and is not

biodegradable; it can also be disposed of with residual waste. If possible, metal parts should be separated and recycled as scrap metal before disposal. Do not burn product residues and do not allow them to enter waterways or the ground.

Manufacturer/responsible economic operator:

SUNRIDE GmbH

Marktplatz 12, 96242 Sonnefeld, Germany
