

GPSR Safety Certificate

Product Name: Genuine Leather Closed Martingale Fork

Artikelnummer: SR10222

Intended use:

The martingale is used to limit and control the horse's head position while riding, to prevent excessive head lifting and to promote consistent rein action. It is intended exclusively for intended use on horses in combination with suitable saddlery and bits. The martingale must not be used to restrain, tie or lead the horse.

Material information:

High quality genuine leather - a natural, durable and breathable material. It is characterized by high tear resistance and dimensional stability. Since this is a natural product, slight color and structure variations may occur. The leather is free of harmful substances and comes from responsible production.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for its intended purpose as an auxiliary rein to limit the position of the horse's head.
- Before each use, check for material fatigue, tears, loose seams, damaged straps or defective fittings.
- If the martingale is damaged or heavily worn, it must not be used.
- Check the fit and adjustment regularly to avoid pressure points, chafing or restricted movement.
- Replace defective metal parts (e.g. rings, buckles, carabiners) immediately.
- Do not carry out any unauthorized repairs or modifications.
- Clean and care for leather parts regularly to prevent drying out, material breakage or deformation.
- Allow wet leather to dry slowly at room temperature - not on radiators or in direct sunlight.
- Do not store near open flames, heat sources or chemical substances.

- Do not leave the horse unattended, especially during transport, in the pasture or in the box.

Disposal information:

The product is made of genuine leather and metal components. Do not dispose of in household waste or the environment. Real leather is a natural material and can be disposed of with household waste if there is no municipal collection for leather scraps. If possible, metal parts should be separated and recycled as scrap metal before disposal. Do not burn product residues and do not allow them to enter waterways or the ground.
