

GPSR Safety Certificate

Product name: Chest extension for horse blankets "Nuuk"

Artikelnummer: SR10136

Intended use:

Chest expansion is used to enlarge the chest area of a horse blanket to optimize the fit on horses with wide chests. It attaches between the front fasteners of the blanket and provides additional comfort and freedom of movement. The product may only be used in combination with a suitable horse blanket. It is intended exclusively for intended use on horses and may not be used as a stand-alone cover, protective device or restraint.

Material information:

The product is made of 600 denier (600D) thread count ripstop polyester fabric and fleece. Ripstop polyester is a synthetic material with woven reinforcement threads that offers high tear resistance, dimensional stability and weather resistance. The fleece material made of polyester fibers ensures soft comfort and prevents chafing in the chest area. Both materials are easy to care for, durable and free of animal ingredients.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for its intended purpose as an extension in the chest area of a horse blanket.
- Before each use, check for damage, loose seams, tears or broken fasteners.
- If the breast expander is damaged or heavily worn, it must not be used.
- The product may only be used in combination with a suitable horse blanket.
- Check the fit regularly to avoid pressure points or chafing.
- Do not leave the horse unattended, especially in the box or pasture if there is a risk of getting caught.
- Do not make any unauthorized changes or repairs to the product.
- Clean only according to care label - do not use chemical cleaners, bleach or solvents.
- After cleaning, allow to dry completely before reusing or storing the product.
- Do not store or dry near open flames, heat sources or chemical substances.

Disposal information:

The product is made of ripstop polyester fabric (600D) and fleece, both of synthetic origin and non-biodegradable. The materials can be disposed of with normal household waste if there is no municipal collection for textile waste. Material separation is not necessary in the private sector. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
