

GPSR Safety Certificate

Product name: EquiTowel absorbent terry blanket

Artikelnummer: SR10274

Intended use:

The terry blanket is used to quickly absorb moisture and sweat after washing or training the horse. It supports the drying of the fur and helps to avoid cooling down. The blanket can also be used as a light sweat-off or feel-good blanket after riding. The product is intended exclusively for intended use on horses and may not be used as a transport, pasture or restraining blanket. Application on open wounds, skin injuries or irritated skin areas is not permitted.

Material information:

The product is made of terry cloth fabric. Terry cloth is a textile material with a loop structure that is usually made of cotton or a cotton blend and has a high moisture absorption capacity. It is soft, absorbent, breathable and feels comfortable on the skin. The material is easy to care for and suitable for direct contact with the horse's skin.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for its intended purpose as a moisture absorption or sweat-wicking blanket on the horse.
- Do not use on open wounds, skin injuries or irritated skin areas.
- Before each use, check for damage, loose seams, tears or worn areas.
- If the blanket is damaged or heavily worn, it may not be used.
- Check the fit regularly to avoid pressure or chafing.
- Allow to dry thoroughly after use to avoid mold or odor.
- Clean only according to the care label - do not use chemical cleaners, bleach or fabric softeners as these may affect absorbency.
- Do not store or dry near open flames, heat sources or chemical substances.
- Do not leave the horse unattended, especially in the box or in the pasture.

Disposal information:

The product is made of terry cloth, which, depending on the composition, is made of cotton or mixed fibers. Cotton is biodegradable, while synthetic components are not biodegradable. The blanket can be disposed of with normal household waste if there is no municipal collection for textile waste. Material separation is not necessary in the private sector. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
