

GPSR Safety Certificate

Product name: Neoprene hoof boots (recycled material, set of 2)

Item number: SR10278

Intended use:

The hoof bells are used to protect the horse's pads and crown edges from injuries caused by hitting the hind hooves. They prevent chafing and damage to the hooves, especially when riding, lunging or during transport. The product is intended exclusively for intended use on horses and may not be used as a fixation, bandage or permanent covering. Application on open wounds, skin injuries or irritated skin areas is not permitted.

Material information:

The product is made of neoprene. Neoprene is a synthetic rubber (polychloroprene) that is characterized by high elasticity, dimensional stability and shock absorption. The material is water-repellent, heat-insulating and at the same time offers good flexibility and adaptability. It is durable, easy to care for, abrasion-resistant and free of animal ingredients.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for its intended purpose as hoof protection on horses.
- Do not use on open wounds, skin injuries or irritated skin areas.
- Before each use, check for damage, tears, loose seams, worn areas or broken fasteners.
- If the hoof boots are damaged or severely worn, they may not be used.
- Check the fit regularly to avoid pressure points, chafing or irritation.
- Do not put it on too tightly - sufficient freedom of movement in the fetlock and ball area must be ensured.
- Clean after use and allow to dry completely to avoid skin irritation or material damage.
- Do not make any unauthorized changes or repairs to the product.
- Do not store or dry near open flames, heat sources or chemical substances.
- Clean only according to care label - do not use chemical cleaners, bleach or solvents.

Disposal information:

The product is made of synthetic rubber (neoprene) and must not be disposed of with household waste. Neoprene is a special plastic that must be disposed of properly at appropriate collection points or recycling centers. Packaging materials such as cardboard boxes or plastic bags must be collected separately and recycled. If the product contains electronic components or batteries, these must be removed before disposal and disposed of separately in accordance with applicable regulations.
