

# GPSR Safety Certificate

Product Name: Satin Bandage Pads (Set of 4)

Item number: SR10099\_4er

## **Intended use:**

The bandaging pads serve as a protective and cushioning pad under bandages on the horse's leg. They support even pressure distribution, prevent pressure and chafing and promote moisture balance. The product is intended exclusively for intended use on horses and may not be used as a restraint, bandage or external protective cover.

## **Material information:**

The product is made of polyester satin. Polyester is a synthetic material that is characterized by high tear resistance, dimensional stability and durability. The satin-like surface provides a smooth, soft feel and reduces friction on the horse's leg. The material is easy to care for, insensitive to moisture and free of animal components.

## **Security rating:**

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

## **Warnings:**

- Only use for its intended purpose as a base under bandages on the horse's leg.
- Before each use, check for damage, loose seams, tears or heavy soiling.
- If there is damage or material fatigue, the bandaging pads must not be used any further.
- Check the fit and fit regularly to avoid pressure or chafing.
- Do not bandage too tightly to prevent circulation problems or pressure points.
- Use only on clean, dry horse skin.
- Allow to dry thoroughly after use and clean regularly to prevent mold or bacterial growth.
- Do not use chemical cleaning agents, bleach or fabric softeners as these can damage the material.
- Do not store or dry near open flames, heat sources or chemical substances.
- Do not change or shorten the product yourself.

## **Disposal information:**

The product is made of polyester fabric with a satin weave. The materials are of synthetic origin and are not biodegradable. The bandaging pads can be disposed of with normal household waste if there is no municipal collection for textile waste. Material separation is not necessary in the private sector. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
