

GPSR Safety Certificate

Product name: Stable gaiters (set of 2) "ActiveCare"

Item number: SR10275

Intended use:

The stable gaiters are used to protect and stabilize the horse's legs in the stable. They support blood circulation, prevent swelling and pressure points and protect against injuries caused by hitting or chafing when lying down and standing up. The product is intended exclusively for intended use on horses in the stable and may not be used as transport, pasture or training boots. Application on open wounds, skin injuries or irritated skin areas is not permitted.

Material information:

The product is made of polyester. Polyester is a synthetic material with high tear resistance, dimensional stability and durability. It is easy to care for, durable, insensitive to moisture and free of animal ingredients.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use as leg protection for its intended purpose.
- Do not use on open wounds, skin injuries or irritated skin areas.
- Before each use, check for damage, loose seams, tears or defective Velcro fasteners.
- If the stable gaiters are damaged or heavily worn, they must not be used.
- Check the fit regularly to avoid pressure points, chafing or circulation problems.
- Do not put it on too tightly – sufficient freedom of movement for the limbs must be ensured.
- Clean after each use and allow to dry completely to avoid skin irritation or material damage.
- Do not make any unauthorized changes or repairs to the product.
- Clean only according to care label - do not use chemical cleaners, bleach or solvents.
- Do not store or dry near open flames, heat sources or chemical substances.
- Do not leave the horse unattended, especially during long periods of rest without control.

Disposal information:

The product is made of polyester and is not biodegradable. The stable gaiters can be disposed of with normal household waste if there is no municipal collection for textile waste. Material separation is not necessary in the private sector. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
