

GPSR Safety Certificate

Product name: Kappzaum "Ely"

Item number: SR10182

Intended use:

The cavesson is used for ground work, lunge work and gymnastic work with the horse. It enables precise aid delivery via the horse's nose and supports training, stretching and positioning without affecting the bit. The product is intended exclusively for intended use on horses and may not be used as a halter replacement, fixation or safety device.

Material information:

High quality genuine leather - a natural, durable and breathable material. It is characterized by high tear resistance and dimensional stability. Since this is a natural product, slight color and structure variations may occur. The leather is free of harmful substances and comes from responsible production.

Security rating:

The product has been tested for safety, material quality and workmanship.

When used properly, there are no risks to consumers or animals.

The product meets the requirements of EU Regulation (EU) 2023/988 (General Product Safety Regulation – GPSR).

Warnings:

- Only use for its intended purpose as a training and guiding aid for floor and lunge work.
- Before each use, check for material fatigue, tears, loose seams, damaged fittings or other defects.
- If the cavesson is damaged or heavily worn, it must not be used.
- Check the fit regularly to avoid pressure points or chafing.
- Do not buckle too tightly - sufficient freedom of movement in the nose, neck and chin area must be ensured.
- Replace defective metal parts, such as buckles or rings, immediately.
- Do not make any unauthorized changes or repairs to the product.
- Clean and care for leather regularly to prevent drying out, material breakage or deformation.
- Allow wet leather to dry slowly at room temperature, away from radiators or in direct sunlight.
- Do not store near open flames, heat sources or chemical substances.

Disposal information:

The product is made of genuine leather and metal components. Real leather is a natural material and can be disposed of with household waste if there is no municipal collection for leather scraps. If possible, metal parts should be separated and recycled as scrap metal before disposal. Do not burn product residues and do not allow them to enter the environment or bodies of water. Packaging materials must be disposed of separately in accordance with local disposal regulations.
